## Instruction Sheet Lidocaine Ointment

To open, push and turn cap counter-clockwise.

To close, push and turn cap clockwise.

A 1 gram dose is approximately 1 inch length of lidocaine ointment which can be measured using the below boxes.

1 gram

2 grams

3 grams

Please refer to prescription label for dosing instructions from your physician.

For example, a common prescription instruction might say, "2 grams up to 4 times daily."

Lidocaine ointment is generally prescribed with monthly refills. It is important that you are using it as directed by your physician to ensure you are getting the expected benefits. Your refills are scheduled to go out on a monthly basis according to your physician's directions as noted on the label.

**Note:** If you find the ointment is greasy, rub into your skin for a minute and it should subside.
